

Dear Parents,

CIS is proud of our partnerships with the greater Caymanian community as we feel that we are stronger when we join with those who can support our learning ecosystem. One such partnership is with KidsAbility, a pediatric therapy clinic that offers speech-language therapy, occupational therapy and clinical psychology services. The services offered by KidsAbility differ from those offered by our other outside providers. As such, we would like to share with you some of what makes KidsAbility unique and what registering for their activities means for you and your children.

- KidsAbility employs trained clinical professionals; as such on occasion they may make learning recommendations to families and members of CIS's student support team, which includes your child's teacher.
- Parents who sign up for this after school class agree that KidsAbility may make suggestions to families for home learning. They may also make learning recommendations to the CIS Student Support Team. The Student Support Team will review recommendations and coordinate classroom interventions as appropriate or possible. The SST will then contact parents to review learning strategies at school.
- Parents who register for a KidsAbility class at CIS agree to an open three way communication between families, CIS SST, and a KidsAbility clinician to partner over supporting any child who could benefit from support beyond what the club offers.

We are pleased to offer this partnership with KidsAbility to support our students at CIS in their learning.

Warm Regards,

CIS Leadership Team
