

## CIS MAP Schedule

### April 30- May 18

CIS students will be taking the Measures of Academic Progress® (MAP) May 1- 19. MAP assessments are unique in that the computer generated questions adapt to the child’s level of learning. The data from the MAP tests will provide information about your child’s instructional level and measure academic growth throughout the school year. With MAP tests we can administer shorter tests and use less class time while still receiving detailed and accurate information about your child’s growth. The average time for each MAP test is an hour, however, it is not a timed assessment and each child will have the necessary amount of time needed to complete each section. Prior to taking the MAP tests there is not any other preparation or studying necessary or required for students.
