

Senior Spotlight: Leanna

I was born and raised in the Cayman Islands my entire life, but have considered myself South African and Texan as well because my family is from those places. I have gone to CIS since it opened in 2006 and also went to Faulkner Academy for my Pre-K and Kindergarten years. I would consider myself to be kind and caring, although I get slightly annoyed when people make arrogant or completely wrong claims.

- **Which is your favourite place on earth? Why?**
 - My favorite places on Earth is a tie between Durban, South Africa and Austin, Texas because I consider those two places to be my second home. Both cities have many of my family members, and both have many things that I can do.

- **What is one quality you admire most in others and why?**
 - One quality I admire the most in others is when they are kind and caring to others, especially when they do it just to make someone's day, because it spreads to other people.

- **What makes you a good person?**
 - What makes me a good person is that I try to be kind to everyone, especially if I see that someone is down.

- **What is your dream job/career? Why?**
 - My dream job is to be an Interior Designer because I have always loved planning what the final design of an object will look like and seeing the design come to life.

- **What are your plans after you graduate from CIS?**
 - My plan after I graduate CIS is to move to either Austin or New York and go to university there, but Austin would be the preferred location.
