

Senior Spotlight: Nathan M.

Hello! My name is Nathan McCoy and I am a senior at CIS. My background and heritage is Caymanian and Honduran, my father being Caymanian and my mother being Honduran. I lived the entirety of my seventeen years in the Cayman Islands. I've been at CIS for 4 years now, this year being my fourth year and I started in 2014 in Grade 9. I am an adventurous and open minded person who loves a challenge in anything he does. Many times during the school year, some of my best grades have come from challenges and competitions with friends. Even though I may seem to be a hardworking student, one of my weakest traits is my time management, as I have a severe problem with procrastination. Yet, I get everything done when it needs to get done. One interesting thing about me that not very many people know is that my favourite genre of music is country.

- **Describe your favorite family tradition.**
 - My favorite family tradition has to be fishing. Both my mother's and father's side take a keen interest in fishing and from a young age they raised me learning how to fish and loving to fish. Fishing could be anything from going to Lobster Pot dock to fish for the small fish right at the dock, to going out into the open ocean chasing marlin and wahoo.

- **What is your favorite movie and why?**
 - My favorite movie of all time has to be Super Bad because of its comical nature.

- **What activities do you enjoy outside of school?**
 - I enjoy swimming and snorkeling and taking underwater photos.

- **Which is your favorite place on earth? Why?**
 - My favorite place on earth, hands down, has to be the little island, a 35 minute flight away from Grand Cayman, which is Little Cayman. My father from a young age would take me to Little Cayman as it was where he grew up. That little island mesmerized me at a young age and still does to this age. Its pristine waters and natural, untouched environment is what really makes this my favourite place on earth.

- **What are your plans after you graduate from CIS?**
 - I hope to become a pediatrician later on in life after CIS and I feel as though CIS has prepared me fully for this demanding task.
