

## Senior Spotlight: Nuala P.

My entire family and I are American. I was born in Hawaii and lived there until I was eight years old before moving. The US and Cayman are the only countries I have ever lived in, living there for eight and nine years respectively. CIS is the only school I have attended while living on island, and I have learned a lot about myself while here. I think that my best trait is that I am hardworking and continuously trying to do better. My worst trait is that I can be rather negative and somewhat hard on myself. Something interesting about myself is that I really enjoy learning new things. Whether I decide to try to learn a new song on the violin or do in-depth research about a topic that I am interested in, I think it is always fun to learn something that I did not know before.

- **Are you a collector of anything? What? Why?**
  - I have a collection of shot glasses, about 40 in total. I collect them from different areas around the world because they are small but often have unique and pretty designs.
  
- **What activities do you enjoy outside of school?**
  - I really enjoy playing the violin and practicing new songs. It is one of my favorite things to do when I am not worrying about assignments or school in general.
  
- **What is one quality you admire most in others and why?**
  - I admire people's ability to focus on the positive even when things are difficult for them. I tend to get very hung up on the negatives, but I always think it is really admirable when people can take a situation and look at it positively. I hope that I can have more positivity this year.
  
- **You're about to walk the green mile, what do you have as your last meal?**
  - I seriously love spicy food so I would eat anything like that. My instant go-to would be curry or noodles with, of course, a side of rice.
  
- **What is your dream job/career? Why?**
  - I really want to be a doctor. I enjoy learning about science and like studying things about how the body works.
