

## Senior Spotlight: Samantha P.

Both of my parents are Canadian, but I was born and raised here in Cayman. I've lived here for the majority of my life, but I've also lived in Ireland and Florida. In total, I've lived here for 12 years, with 2 years in Ireland and 2 years in Florida in between. This is my 3rd year at CIS, which is the longest I've stayed at a school since elementary school. To describe myself, I am a very social person that is also determined to do well in school and sports. Along with this, I procrastinate way too much. Finally, an interesting fact about me is that I have too many friends called Sam.

- **What activities do you enjoy outside of school?**
  - Outside of school, gymnastics has pretty much been my whole life since I was born. I train between 20-30 hours per week and when I'm not in the gym I'm probably hanging out with friends.
  
- **If you could have any superpower, what would it be? Why?**
  - Definitely the ability to transport because I could be anywhere in the world within 2 seconds.
  
- **Which is your favorite place on earth? Why?**
  - It sounds cheesy but my favorite place on earth is just hanging out with all my closest friends, no matter where we are.
  
- **What is your dream job/career? Why?**
  - My dream career is working as a Marine Biologist/conservationist in exotic countries around the world. I would like to continue travelling and work directly with marine life.
  
- **What are your plans after you graduate from CIS?**
  - As soon as I graduate from CIS, I plan on taking a gap year to travel and get work experience in Marine Biology. I am looking at internship programs in Fiji, Southeast Asia, and South America. I will be working directly with marine life, and once I am done with that, I plan on going to university the following year.
